

| 編號 No. | 作者 Author        | 論文摘要篇名 Abstract Titles (2012 Taiwan-Japan Nanophotonics and Plasmonic Metamaterials Workshop)  |
|--------|------------------|--|
| 14     | Hong-Jhang Syu   | Silicon Nanowire/Organic Hybrid Solar Cell with High Efficiency of 9.47%                       |
| 15     | Atsushi Ishikawa | Bilayer Graphene for Active Plasmonics and Metamaterials                                       |
| 23     | Yoshito Okuno    | Tip-enhanced Raman imaging and analysis of crossed nanotube junctions                          |
| 26     | Kei Maehara      | Vertical magnetization manipulation method for magnetic nanodot with magnetic force microscopy |
| 44     | Yao-Wei Huang    | Plasmonic Toroidal Response of U-shaped Resonant Rings at Optical Frequencies                  |
| 46     | Tzu-Fang Tseng   | High-sensitivity in vivo THz mammography of early human breast cancer in a mouse model         |
